 T&C

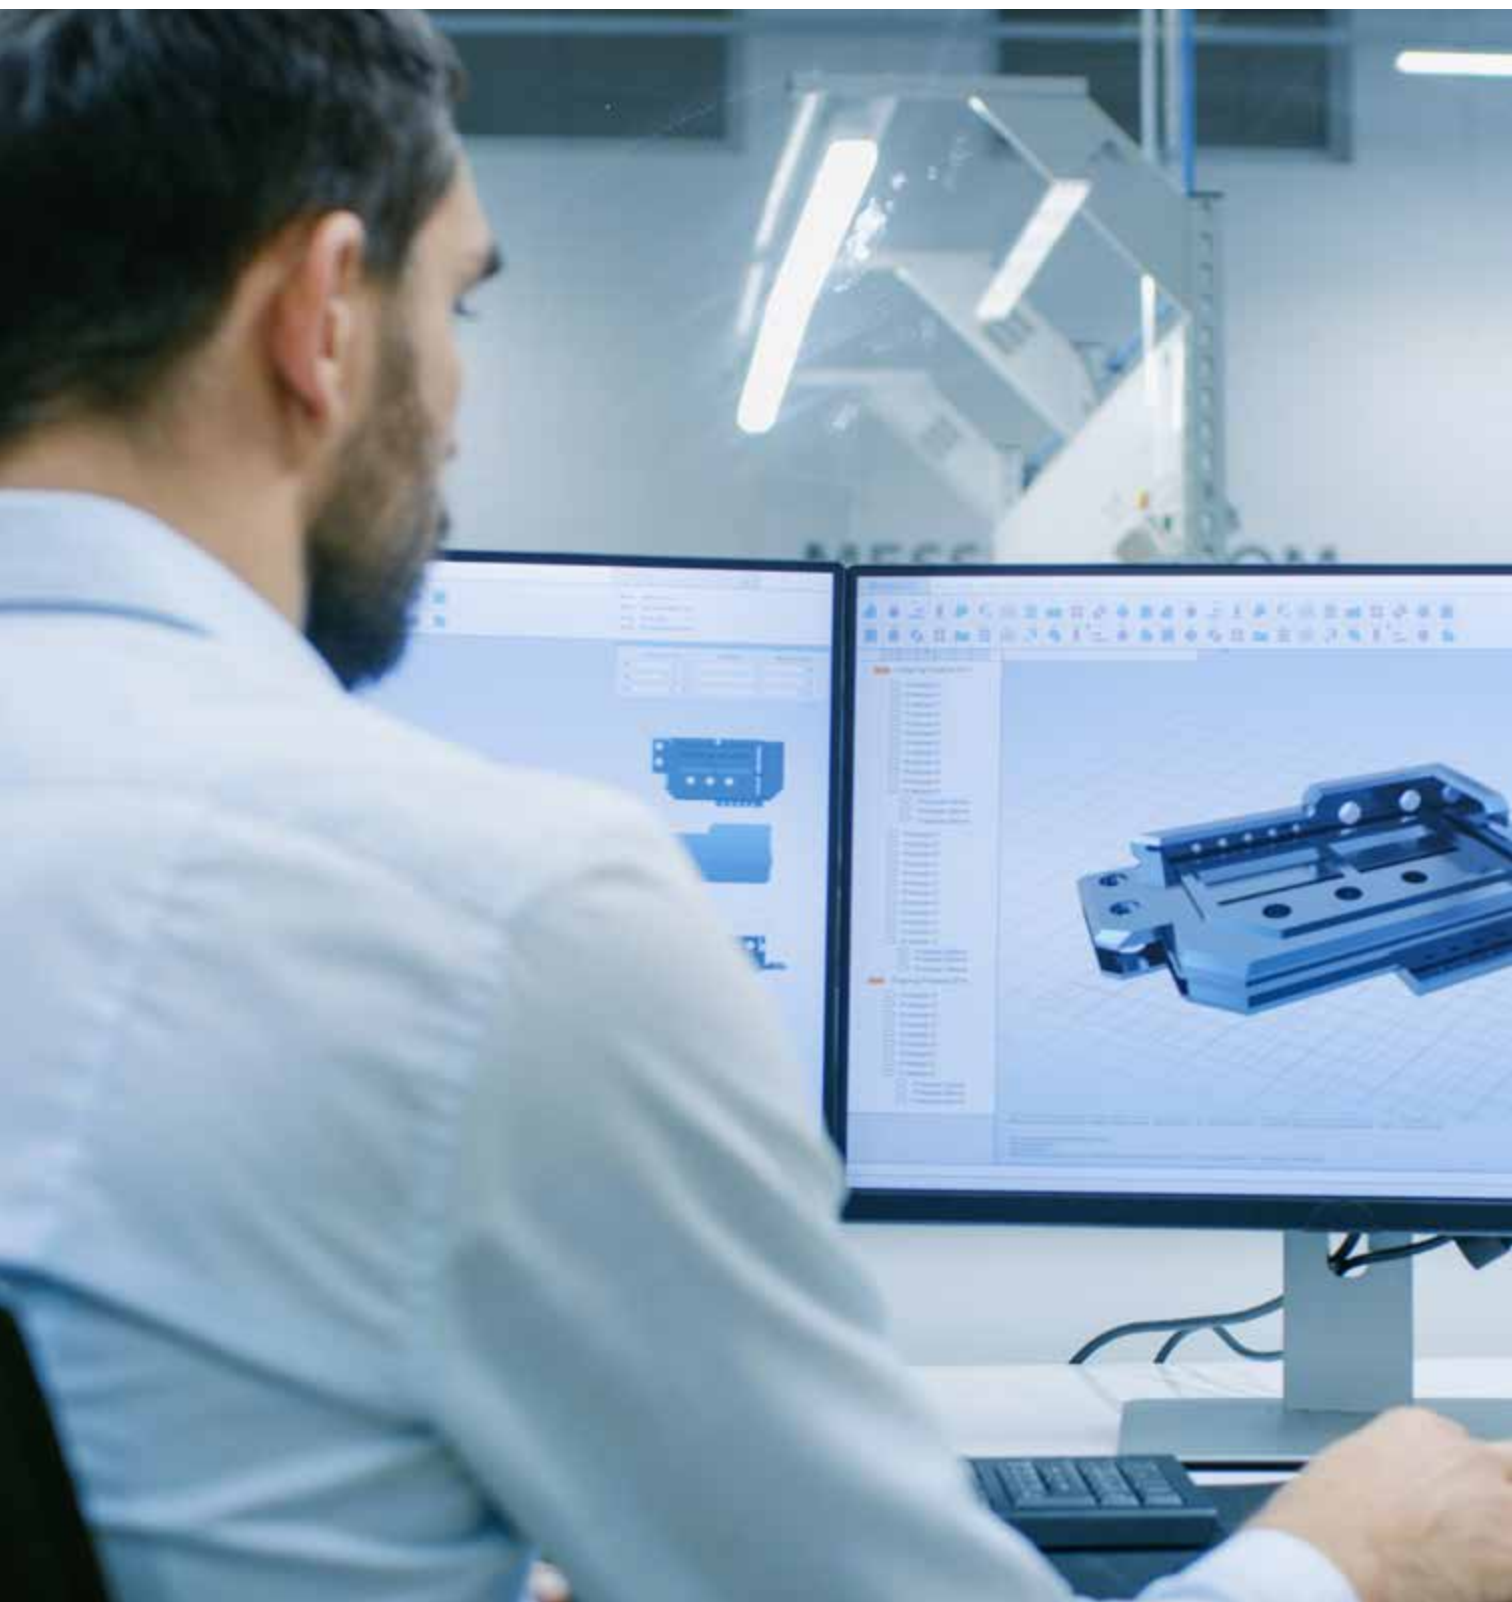

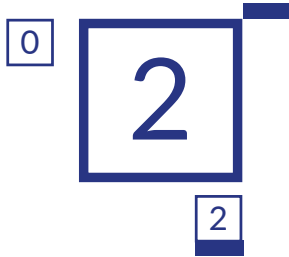

WHO ARE WE?

TÉCIMAN INTERNATIONAL was founded in 1991 aimed to offer answer to the ever more demanding requirements of the industrial sector, initially focusing its efforts on the consulting and Metrology 3D services, field where today is a benchmark.

An almost three decades carrier working with our customers in hundreds of projects of various kinds, allowed us to become who we currently are: a multidisciplinary, innovative and international company.

WHAT DO WE OFFER?

TÉCIMAN has three main activity areas offering the following services:

3D METROLOGY AREA

Comprehensive management of maintenance, tuning and calibration of 3D measuring equipment.

Inspection services, measuring and development of measuring ranges/ programs for geometric control and verification of production systems.

3D scanning with laser and optical systems for reverse engineering tasks.

Retrofitting of equipment and 3D measuring machines.

OUTSOURCING FOR ENGINEERING AREA

We provide industrial engineering services focusing on the outsourcing needs any company may have on the development of their projects. Therefore, allowing our customers to have at disposal the best specialists quickly and efficiently.

We collaborate in the phases of design, development, implementation, industrialization and mass-production life of the product, adapting the periods of intervention to the customer's requirements.

The outsourcing area accumulates all the experience and knowledge acquired by TECIMAN during almost three decades.

SELECTION TECHNICAL STAFF AREA

Services focused on the identification and selection of candidates with technical profile, both mid-level and management, offering the solvency of a company expert in engineering as the best guarantee of success.

The selection process is conducted by professional, specialists in engineering, seniors.

WHERE DO WE PROVIDE SERVICE ?

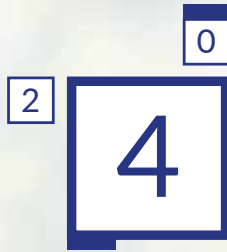

WITH WHOM DO WE WORK?

Although TÉCIMAN is present in different sectors such as aeronautics, defense, railway, wind, plastics, equipment assets, etc., is its position in the automotive sector, where is reference supplier in a myriad of companies, both constructors of vehicles (OEM's) and manufacturers of equipment and components (TIER-2, TIER-1).

We count on clients from different parts of the world, thanks to the support of our delegations in Central Europe.

OUR PHILOSOPHY

We believe innovation and continuous improvement to be the best strategy to maximize quality and service related to cost.

And to do so, nothing better than the commitment of an entire team believing that the client is the cornerstone, much more than the compass of our strategy.

That is why we claim that **our customers are the core of our Vision.**
